High-Definition, Multi-Touch Color Display

Powered by Android™

Integrates with UniFi® Enterprise System

Smartphone Technology for Corporate Environments

The UniFi VoIP Phone is an enterprise desktop smartphone solution with a brilliant, high-definition color display designed for modern communication, organization, and productivity. Built on Android and integrated into Ubiquiti's UniFi Enterprise System, the UniFi VoIP Phone is the next-generation standard for corporate communications.

Download and install your favorite apps, stream media, browse the Internet, and access content created and stored in your Google™ accounts. Each phone can be uniquely personalized, while all the phones are easily deployed and managed with UniFi software.

Disruptive Pricing, No Fees

The UniFi VoIP Phone provides breakthrough value. The UniFi Controller software is bundled with the UniFi VoIP Phone at no extra charge – no separate software, licensing, or support fee.

Features

Plug and Play Installation Use a standard Ethernet cable to connect and power the UniFi VoIP Phone with a UniFi Switch (or other 802.3af compliant switch). The UniFi VoIP Phone is designed to integrate with the UniFi Controller and UniFi Security Gateway, so the phone is automatically provisioned for fast deployment.

Scalable System Management Ubiquiti's proprietary SDN software, the UniFi Controller, provides scalable system management of UniFi VoIP Phones, including extension management and mass firmware upgrades. Such ease of use makes the UniFi VoIP Phones ideal for deployment in small businesses, corporate locations, schools, and hotels.

Powered by Android The UniFi VoIP Phone is powered by the Android operating system. Access media content, browse the web, and visit the Google Play™ store to download and install your favorite apps.

Elegant Design The UniFi VoIP Phone features a sleek and elegant industrial design.
